agency securities

Agency securities are bonds and notes issued by government-sponsored enterprises, or GSEs, including Fannie Mae (FNM:NYSE), Freddie Mac (FRE:NYSE) and the Federal Home Loan Bank. They are the highest-quality debt instruments after Treasury securities.

Don't confuse agency securities with mortgage-backed securities, some of which are issued by the same entities.

At the end of 1999, there were about \$1.6 trillion of agency securities outstanding, compared to \$3.6 trillion of Treasuries. But with Treasury issuance declining and agency issuance rising, the agency market is on track to pass the Treasury market in size by 2004.

Agency securities are a variety of spread product and are evaluated as such.
